Hey there! Welcome to my world of beauty and transformation! ✨🌟

I'm Rachel, your go-to guru for all things laser, tattoo removal, semi-permanent makeup, and aesthetic treatments. But hey, I'm not your average beauty expert - I'm here to make your journey to flawless skin and self-expression a fun and unforgettable experience!

Picture this: a magical realm where unwanted tattoos vanish into thin air, brows become works of art, and your skin radiates with a healthy glow. That's the world I create for my amazing clients every single day!

With my laser tattoo removal expertise, I'll help you bid farewell to that tattoo that no longer serves you. Say goodbye to regrets and hello to a fresh canvas for new beginnings. Let's turn that 'oops' into an 'ahh-mazing'!

But wait, there's more! I'm also a master of semi-permanent makeup, the art of enhancing your natural beauty. Whether you want perfectly sculpted brows, luscious lips, or captivating eyeliner, I've got you covered. Get ready to wake up flawless and slay all day, every day!

And let's not forget about the world of aesthetic treatments. From rejuvenating facials to skin-tightening wonders, I'll help you unlock your skin's full potential. Get ready to turn heads and unleash your inner goddess!

But here's the best part - I'm not just your beauty expert, I'm your partner in crime. We'll laugh, we'll chat, and we'll create a space where you feel comfortable and empowered. Because beauty isn't just about looking good, it's about feeling amazing in your own skin!

So, whether you're ready to say goodbye to that tattoo, enhance your natural beauty, or indulge in some self-care, I'm here to make it happen. Let's embark on this incredible journey together and make some magic!

Book your appointment today and let's create the best version of you. Trust me, it's going to be a wild and beautiful ride!

With love and beauty,

Rachel x

*Semi
permanent
make up info*

The combination brow

This type of tattooing is where I do a mixture of hair stroke and powder techniques for the best of both worlds. This treatment is best suited for those wanting a more makeup effect.

*Initial appointment: £300
4-8 week top up: £50*

*1-2 sessions required
Lasts 1 - 3 years
Yearly Top Up recommended 12-18 months
Suitable for any skin type*

The hair stroke brow

The Hair Stroke Brow is where I tattoo nano hair strokes into the brow to replicate real hair growth.

This treatment is perfect for anyone with some natural brow hair, and they are wanting to create a more fuller fluffier looking brow.

*Initial appointment: £300
4-8 week top up: £50*

*1-2 sessions required
Lasts 1 - 3 years
Yearly Top Up recommended 12-18 months
Suitable for any skin type*

Lipblush

lip blush is the ultimate treatment, it involves creating shape and definition. The treatment is completely tailored to you, and is perfect for anyone who lacks definition or pigmentation within the lip tissue. 1

*HD lips that are a more saturated coverage giving a lipstick effect
Sheer lips that are more of a natural coverage.*

*Initial appointment: £300
4-8 week top up: £50*

*1-2 sessions required
Lasts 1 - 3 years
Yearly Top Up recommended 12-18 months
Suitable for any skin type*

General pre care

PMU (Permanent Makeup) is a mild form of a tattoo. We use small needles and implant pigment/ink into the dermis of the skin. You must be 18 years of age as a minimum Prior to your PMU procedure

To achieve the best results you may be required to return for a second application between 6-12 weeks after the initial application. Then ongoing we recommend a yearly top up to keep your PMU fresh and up to date, the colour will fade overtime.

Be prepared for the colour intensity to be significantly sharper and darker immediately after the procedure. This will subside and become softer as the skin heals. This process can take up to 14 days but usually 5-7 days.

Keep in mind delicate skin or sensitive areas may be swollen or red, if you have any social plans bear this in mind for lip and eyeliner treatments as they can be slightly swollen for a few hours or a few days.

Avoid alcohol intake 48 hours prior to your PMU treatment

Avoid caffeine on the day of your treatment prior PMU.

Do not take blood thinning medication such as aspirin, ibuprofen, nurofen 2 days prior to your PMU

Do not discontinue any medication before consulting your doctor.

Do not use AHA skincare products close to the area to be treated for 4 weeks prior to your procedure.

Avoid professional chemical peels close to the procedure site for 4 weeks prior to your procedure.

Please be aware that the National Blood Service does not accept donations of blood for 4 months after PMU

Pre-care for brows

NO skin conditions in the brow

NO Alcohol or caffeine 48 hours prior

NO Fillers or injections in or around the brows 4 weeks prior

NO Waxing around the lips 1 week prior

Stay hydrated

Avoid retinol, AHA & chemical peels 4 weeks prior

Strong skin care and facials that include chemical peels, acids and retinols must be avoided through the brow area for 4 weeks prior to treatment.

The brow area must be free from eczema or psoriasis and the eyebrow skin needs to be in good health. If you have any moles or raised scars within the eyebrow area these will be avoid as we are unable to work over these areas.

Please **do not** attend your appointment with heavy make up on, as we will *have to cleanse and remove the makeup resulting in scrubbing the skin causing sensitivity*

Avoid sun beds 2 weeks before and post procedure

Keep your skin hydrated - Skin Food is a great moisturised and affordable

Pre-care for lips

Keep lips moisturised
& exfoliated

NO Alcohol or caffeine
48 hours prior

NO Fillers or
injections in or
around the lips 4
weeks prior

NO Waxing around
the lips 1 week prior

Stay hydrated

Cold sore medication
if needed

If you have a history of cold sores (herpes simplex) and are scheduling a lip tattoo we advise you to use anti-herpes medication to prevent an outbreak. If you had an outbreak 2 weeks ago or 10 years ago we highly recommend taking the prevention steps.

Topical Cream: Zovirax ointment you can buy in any chemist store and apply 5 times a day for 1 week prior and post treatment.

Oral Tablets: Acyclovir tablets via online prescription, lipblush does not cause cold sores, however if you carry the virus, it lays dormant in the nervous system and can be aroused by the tattoo process.

Lightly exfoliating your lips to remove dry dead skin will help with better retention

Keep your lips moisturised - do not turn up to the appointment with chapped lips

Bring in your favourite lip colour for everyday wear to your appointment.

General after care

Normal symptoms you may experience for 4 days

Swelling, redness, tenderness

Dry flaking skin as the area heal

Itching is normal

DO's

Clean the area x1 daily with the solution in your kit. OR Damp cotton pads / Water wipes are fine to clean with too

Apply a thin light layer of healing balm in your kit using a cotton bud, Use a new bud each time to prevent cross contamination (brows & lips)

Use the cream for 1 week very minimal – less is more.

DONT's

Do not pick, peel or touch the area as you will heal unevenly and risk infection from bacteria.

Do not apply any makeup on the area for 1 week

Do not apply too much cream in a thick layer will cause suffocation. Less is more!

Do not submerge the area in water for 1 week

Do not receive skincare beauty treatments for 5 days

Do not receive waxing, electrolysis or laser hair removal treatments close to the area for 2 weeks

Do not expose the area to direct sun, tanning treatments, Jacuzzis, saunas, salt water, chlorinated pools and direct shower spray for 2 weeks post treatment

Do not apply strong skin care over or close to the area

Do not apply lash extensions or any lash lifts for 2 weeks post treatment

Remember, your selected colour will be stronger and more sharply defined immediately after your treatment and will take around a week to settle down.

Day 1-3 the colour will appear darker

Day 3-7 they may get itchy and flakes of colour may come away from the skin, this will come off in patches and is completely normal

Once the flakes are all off the pigment may appear light in colour – the chosen pigment will blossom during the 6 week healing

Keep in mind that in many cases, some unevenness of colour is to be expected. This is the purpose of the second session to make any adjustments needed.

Long Term Care

Use a good sunscreen. Sun exposure will fade your Brow Tattoo. Recommend SPF 30 or 50

If you are planning a chemical peel, laser procedure or an MRI scan please let us know. The pigments and inks we use have Iron Oxides, Titanium Dioxide and Carbon in the formation. Please inform the National Blood Service if you donate blood, as you may not be eligible to give blood for 4 months post application.

*Laser tattoo
removal info*

Welcome to our laser tattoo removal service! Rachel specialise in removing both semi-permanent makeup and body art using our state-of-the-art undo PMU machine. Rachel is dedicated to providing safe and effective tattoo removal treatments to help our clients achieve the results they desire.

Whether you're looking to remove an old tattoo that no longer suits your style or want to correct a botched semi-permanent makeup procedure, we've got you covered. Our advanced laser technology allows us to target and break down the ink particles in the skin, gradually fading the tattoo or makeup until it is completely removed.

At our clinic, we prioritise client safety and satisfaction above all else. We take the time to assess each individual's unique skin type and tattoo characteristics to develop a customised treatment plan that will yield the best results. Our goal is to make the tattoo removal process as comfortable and efficient as possible, so you can feel confident in your decision to erase unwanted ink.

Say goodbye to your unwanted tattoos and semi-permanent makeup with our laser tattoo removal service. Book your consultation today and take the first step towards a clean slate

A patch test is require 1 week prior to full treatment

Laser after care

If you have any questions or concerns about your procedure, please feel free to contact me directly on 07581402956 this phone is monitored out of hours.

If you are concerned that your procedure has become infected, or you feel unwell following your procedure, please contact your go first and notify the clinic AFTERWARDS.

It is important that you adhere carefully to the instructions provided to you by your technician in this form, failure to do so can lead to infection and in rare cases, scarring of the site.

Careful attention needs to be taken when caring for your tattoo removal post procedure. Within the next week your tattoo site will start to heal, do not pick or pull at the treated area.

It will take 25 hours for your skin to establish a protective barrier, so be careful not to touch (or let anyone else touch) it as you could introduce an infection during this time.

After your procedure you may notice (each treatment can display different responses):

Frosting on the skin - this is white raised vapour bubbles, they will subside.

Tiny spots of pin prick bleeding

Your tattoo site is raised

The area around your tattoo is red (erythema)

Itching

Bruising

Blistering - don't worry if this happens, and it is not a sign that you will scar

A micro scab forms over the wound approximately 5 days post procedure - this may look like dry skin, do not pick this.

Cool packs can be used to cool and soothe the area and help with redness and swelling but try not to touch the area too much and keep it clean. The best way to look after your tattoo is to dry heal. We don't recommend creams or gels

IMPORTANT NOTES:

In the vast majority of cases scarring is caused by picking the wound or micro-scab or touching the removal site and introducing an infection. PLEASE RESIST THE URGE TO TOUCH OR PICK!

During the removal process and for 6 weeks afterwards you will need to keep your removal site out of sunlight, alternatively you can use a sunblock on the area to keep it protected minimum SPF50

You may notice that the area is lighter than the surrounding skin (hypopigmentation) in most cases this will resolve entirely over time

You may notice that there are changes to the texture of the skin. This is likely to have been caused by the original tattoo rather than the removal process.

If you intend to have a cover up tattoo on the site of the removal, please wait for at least 8 weeks until the dermis is completely healed before you have the procedure.
